ACHIEVEMENTS/AWARDS

Enactor of the Week	May, 2025	Enactus KNUST
---------------------	-----------	---------------

PROJECTS/RESEARCH EXPERIENCE

Academic Network (Acanet) – Mobile App

- Developed a mobile-based platform that enhances student-lecturer communication by enabling seamless global connectivity regardless of location. The application allows users to connect with lecturers and peers worldwide, including nearby lecturers through an integrated map-based search feature. It also supports adding and managing connections, where users can build a personalized network of lecturers and students, facilitating academic collaboration and knowledge sharing across distances.
- **Stacks:** React Native, JavaScript, Firebase, Figma, Google Maps, Expo

My Academia – Mobile App

- Developed an AI-powered academic planning application designed to help students efficiently organize their studies and improve academic performance. The system enables users to generate personalized timetables by selecting courses, priority levels, and available study times, after which an AI automatically structures an optimized schedule. It also supports school timetable creation with timely notifications, CGPA/CWA calculations with performance insights, and an AI chatbot (powered by the Gemini API) that provides answers to general academic and knowledge-based questions, enhancing learning support and productivity.
- **Stacks:** React Native, JavaScript, Figma, Expo, Gemini, Node JS, Firebase

Land Secure Real Estate App– Mobile App

- Developed **Land Secure**, a real estate platform that connects verified land sellers with potential buyers through a secure and transparent system. Sellers register and undergo document-based verification before listings are approved by an administrator to ensure legitimacy. Buyers can browse verified land listings, view ratings and details, and use integrated map functionality to locate properties. The platform also enables buyers to schedule meetings with sellers for on-site inspections, promoting trust, transparency, and safe land transactions.
- **Stacks:** React Native, JavaScript, Expo

KOB Hawala – Mobile App

- A secure cryptocurrency trading application that enables users to trade a wide range of digital assets, including Bitcoin, USDT, and other cryptocurrencies. The platform provides real-time market data updates to support informed trading decisions and incorporates strong security measures such as biometric authentication, email verification, facial identity checks, and national documentation verification. It also features a custom-designed user interface focused on usability and a smooth trading experience.
- **Stacks:** React Native, JavaScript, Expo

PROFESSIONAL TRAINING/ CERTIFICATION

Techprenure' s Bootcamp	June, 2022	Techstripped Africa
Cyber Security Fundamentals	3 rd August, 2025	IBM Skillbuild
Introduction to Artificial Intelligence	January, 2026 – February, 2026	IBM Skillbuild
Fiber Optics Training (Splicing and Repair of Fiber Optics)	13 th February, 2026	Johvic Fibertech Solutions

LEADERSHIP EXPERIENCE

Vice President, Enactus KNUST (August 2025 - August 2026)

- Supporting organizational leadership, strategic planning, team coordination, and the execution of impactful student and community initiatives.

Technology Division Lead, Enactus KNUST (August 2025 - August 2026)

- Leading creative and technical teams in graphic design, software development, photography, videography, and digital content production.

Chief Technology Officer, NextMakers Foundation (April 2026 - Present)

- Overseeing technology strategy, digital innovation, and the development of scalable solutions that support the foundation's mission and impact.

VOLUNTARY/EXTRA-CURRICULAR ACTIVITY

- **Project iSolar (Team Member), Enactus KNUST** - Collaborated with a team to design affordable, solar-powered irrigation systems that help tomato farmers increase yield and reduce post-harvest losses.
- **Technology Division (Team Member), Enactus KNUST (May 20)** – Served as an active member of the tech team, where I supported event publicity through digital designs, managed technical setups during programs, and contributed to maintaining the team's online presence. I also collaborated with others to ensure smooth execution of tech-related tasks and promoted engagement through creative and tech-driven solutions.
- **Ambassador, BAPX** - Collaborated with a team to publicize the new platform created by the startup which helped student and non-students to apply for jobs online with stress free and at no cost
- **Woo Commerce, Kumasi Chapter (Volunteer)** - Collaborated with a team in the production of graphic design materials for events, campaigns, branding and organizational communications

SKILLS AND ABILITIES

- **Frontend Development:** Skilled in building modern, responsive, and scalable web applications that combine clean design, functionality, and efficient frontend development practices using modern frameworks and technologies.
- **Mobile Development:** Skilled in developing cross-platform mobile apps with a focus on performance and usability.
- **Graphic Design:** Experienced in creating visually appealing designs for digital platforms using tools like Adobe Photoshop, Canva, and Figma.
- **UI/UX Design:** Strong understanding of user experience principles, wireframing, and prototyping to deliver intuitive and engaging interfaces.
- **AI Tools:** I am proficient in leveraging AI tools and intelligent systems to enhance collaboration, improve workflow efficiency, and accelerate project delivery while maintaining high-quality results.
- **Project Management:** Capable of planning, organizing, and overseeing projects from concept to delivery, ensuring timely completion and quality outcomes.
- **Collaboration & Communication:** Effective team player with strong interpersonal skills, able to coordinate across departments and communicate technical concepts clearly.
- Proficiency in Microsoft Suite such as Word, PowerPoint, Teams, Excel and Outlook
- **Soft skills:** Verbal and written communication, user empathy, time management, critical thinking, teamwork and adaptability to different situations and scenarios.
